-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis for the "blade" recited in line 2.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5, 7, 9 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Granum et al.

There is disclosed in Granum a food processing apparatus, comprising: a housing; an electric motor 154 located within the housing; a torque transmission 170 supported by the housing, and including transmission gears for receiving input from the electric motor and providing a first output shaft 40" and a second-speed output shaft 250 that rotates at a different speed than the first output shaft; a crushing module 42", 58", 66" supported by the housing and receiving torque from the first output shaft; and a

blending module 36', 272 receiving torque from the second output shaft, the blending module including a whisk and a vessel.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Granum et al. in view of Mitsybayashi et al.

Mitsybayashi discloses the use of a hinged lid 33 on a crushing module.

It would have been obvious to one skilled in the art to provide the lid 286 of the crushing module of Granum with a hinge as taught by Mitsybayashi, for the purpose of allowing the lid to stay attached to the module when feeding material thereto.

Claims 3, 4, 13, 17, 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Granum et al. in view of Kuan.

Granum discloses all of the claimed subject matter except for a crushing module which includes a contoured crushing disk and blade arrangement.

Kuan discloses that it is known in the art to use a rotary contoured crushing disk 24 that bears down upon an ingredient, and a blade arrangement 312, 342 for cutting the ingredient into pieces.

It would have been obvious to one skilled in the art to substitute the contoured grinding head 66" of Granum with the disk and blade arrangement taught in Kuan, for

the purpose of providing an alternative means for cutting the food product, and the way the product is cut.

Allowable Subject Matter

Claims 6, 8, 12, 14-16 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 21 and 22 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Beaudet et al., Schottle, Arao et al. and Thuma are cited for their disclosure of the state of the art.
